## Single mandatory testing after summer break in Göppingen daycare facilities for children

Dear Parents and Care Providers,

The pandemic has kept us in suspense for a very long time now! Happily, the incidence rate in Göppingen has been very low for several weeks. We are especially pleased that traveling abroad has been made easier or even possible again for the upcoming summer months and the vacation season. In this regard, we wish all a pleasant and relaxing summer season and look forward to welcoming your children back to the daycare centers in the new kindergarten year.

In order to continue to contain the incidence of infection as best as possible, mandatory single testing will be introduced for the children upon their return. This means that all children must present a negative Corona rapid test result upon entering the daycare center on the first day after the holidays in order to be permitted entry to the daycare center. Subsequent to this date, there is no further obligation for the children to be tested.

This obligation can be fulfilled by presenting a corresponding certificate of a negative test result (available when a test is carried out in one of the many official test centers, doctor or pharmacies). This must not be older than 48 hours.

Unfortunately, it is not possible to carry out an alternative Corona rapid test in the daycare center or by independently performing a rapid test at home.
